

**Great Basin Priority Summary - Based on Most Recent 209's
8/14/2020**

Priority	Unit ID	Incident	Suppression Strategy	Descriptive Location	Size	24 hr Change	% Ctn	Expected Ctn Date	Complexity / IC Name	Crews		Helicopters			Total # Persons	Critical Needs	Threats
										T-1	T-2IA or 2	T-1	T-2	T-3			
New and emerging initial attack within the Great Basin																	
	ID-MHQ	Juniper Butte	Full Suppression	2 miles NE of Juniper Butte, ID	1800+	New	0%										Military installations, Bruneau,
On-going incidents within the Great Basin																	
	NV-WID	Poodle	Full Suppression	20 mi. NW of Gerlach, NV	12,100	8,600	10%	8/20/20	Type 3 IC Anthony Perez	3	3	1	1	1	173	Type 2 IMT on Order: GB Team 4	Hwy 279, Hwy 227, mule deer range, SGH, grazing allotments, Major corridor for the LA CAL powerlines.
	ID-SWS	Pumpkin	Full Suppression	8 mi SSW of Garden Valley, ID	438	0	10%	9/7/20	Type 3 IC Tyler McCowan	5	6	3	4	2	344	Maintain air support.	Hawley Mtn LO, BLM, FS and IDL Repeater sites, Private timber to the south.
*** Notes of Significance *** Fires highlighted in yellow have submitted a FINAL ICS-209																	
	NV-EURX	Pine	Full Suppression	9 mi S of Carlin, NV	886	-334	100%	8/15/20	Type 3 IC Goodson	0		0	0				

Evening Brief

Date: Friday August 14, 2020

Weather Summary

Weather:

***** Gusty Winds/Low RH Across Southern Idaho Today *****

***** Isolated Thunderstorms Sierra Front Today Expanding and Spreading Northward This Weekend *****

***** Hot Record-Breaking Heat across the Great Basin This Weekend into Next Week *****

The 4-corners high will be building and shifting further westwards and be centered over the central Great Basin this weekend through early next week bringing very HOT weather. Temperatures will reach or exceed records across most of the Great Basin later this weekend into next week with valley highs reaching near or over 100 degrees over the northern half of the region and over 110-115 in the far south.

Tropical moisture across Arizona shifts towards Western Nevada today through the weekend, with some isolated to widely scattered mixed Wet and Dry lightning spreading through northwest Nevada through Sunday. Lightning potential spreads north into Nevada/Idaho Mon/Tue, then spreads east into the rest of Nevada/Utah from mid to late week. **High Risk for Lightning** has been issued for western/northern areas of Nevada/Idaho this weekend into early next week, as fuels in these areas are quite dry and will rapidly dry further with record breaking heat.

Fuels/Fire Potential

Fuels/Fire Potential:

***** Fuels and Fire Behavior Advisory is currently in effect for eastern and southern NV Across UT and the AZ Strip *****

Fuels in all regions, of all class sizes, have dried to critically dry fuel conditions. Abnormally dry fuels continue across the southern portion of the region, which have been devoid of monsoonal moisture for the past 2 weeks.

Live fuel moisture in the sagebrush has dropped near or below 100% across most lower elevations, from the Snake River Plain southward into most of Utah, Nevada and the Arizona Strip, supporting Extreme Fire Behavior.

Across the Central Idaho Mountains into Western Wyoming heavier dead fuels are drying rapidly to near August normals, but grasses still green in many areas, with dry duff being the main support for ground fire.

Preparedness Levels & Great Basin Fire Activity (from WFDSS)

Great Basin	PL 3	Light to Moderate Initial Attack Activity
National	PL 4	New Fires and Acres: 21 fires for 2741.4 acres

Resources:

Aviation within the Great Basin

- 1 VLAT, 4 LATs, 1 Scoopers
- 25 SEATs, 13 AA, 1 ASM
- 9 Type 1 Helicopters
- 12 Type 2 Helicopters
- 19 Type 3 Helicopters
- 1 Helco's

Crews Committed within the Great Basin

- 13 IHCs / 1 Available
- 16 T2 IA / 2 Available

Current Incident Details

Today's Activity (from WFDSS):

Incident Name	Unique Fire Identifier	Size	Status	Latitude	Longitude	Pt. Of Origin Sage Grouse Habitat
Park Creek	2020-IDSTF-000250	1	Not Contained	44.27057	115.0122	NO
